CORPORATE PROFILE

Since inception in 1996, PASR Technologies (PASR) has been providing One-Stop IT Services to our business clients, enabling a single point of contact for all IT-related needs. We effectively streamline all IT operations, allowing our clients to bypass inter-vendor issues and cut unnecessary administrative work.

As part of our quest to be the preferred IT-managed services and hosting partner to small businesses across Asia, we specialize in the following core competencies:

- IT Managed Services (Outsourcing): Catering to businesses from one to up to 250 employees regionally, we manage IT services for both infrastructure and applications. Our clients range from local SMEs through to regional offices of larger MNCs, and hail from the airline, logistics, manufacturing, construction, legal and shipping industries, among others.
- Hosting: We offer application, web and email hosting using the Software-as-a-Service (SaaS) model.
- Development: Harnessing Microsoft's ASP.NET Framework and SQL Server, we offer a specialized line-of-business bespoke application development using highly object-oriented techniques featuring delivery and access via a web browser.

During our 15 years as IT specialists, we have been appointed as Microsoft Partner, IBM Partner for Intel Systems, HP DSPP Member and Microsoft SPLA Reseller. We also hold partnerships with Singtel, Starhub, Symantec, CISCO, Hewlett Packard, 3 COM and many others, in an effort to deliver high quality IT support that is cost-effective to every business and tailor-made to suit each company's requirements.

Our commitment to efficiency and reliability has garnered us several notable clientele in both the commercial and government sectors.
